Customer Reviews

I know everybody has different opinions but wow! I didn't know which review to believe, so I borrowed this book (for free) to check it out before buying, just in case ;) So here's my 2 cents.. As one reviewer said, I haven't played craps like this before. This is true. It's definitely worth a shot to try the method in this book. I found it clever to mix an investment strategy with a craps bankroll. I can see it working. Though, I guess some might not like the info if they've already figured this out on their own. Whether you learn it from the source promoted in this book or go to somebody else's seminar is irrelevant. Once you know dice control, this book has some helpful tips to growing a bankroll. Most dice controllers blow through their money even with this skill, so I do recommend following some sort of discipline. This book simply introduces a new type of discipline. And yes, I think it's possible to use the technique in this book to win 30K. But like anything else, it's not handed over on a silver platter. I can see why this would annoy impatient players who want to win big in one sitting. My suggestion to the new craps players?: Learn dice control from somewhere. The book does state it's meant for someone who knows dice control (or 'skilled shooter') - though a new player MAY be lucky enough to complete the 60 day goal. Though, I find that unlikely. Is it a 5 star book? Maybe to some and (obviously) not to others. To me it's a 4 star book since I play a lot of craps and I can't say this was groundbreaking - just some new good tips. It's a good book for my library, which is why I ended up buying it. Someone starting out with craps may find this to be a 5 star book, though.
